9. Bonus Example - How It Works

To help clients better understand how the bonus system works, here's a breakdown:

Example 1:

• Client deposits \$500

Bonus received: \$500 (100%)

Total trading account balance: \$1,000

Required trading volume to unlock bonus:
 10 lots per \$100 → 50 standard lots total

Once the client completes **50 standard lots** of eligible trades within 30 days, the **\$500 bonus and any profits derived from it become withdrawable**.

Example 2:

• Client deposits \$100

Bonus received: \$100

Required trading volume: 10 standard lots

- If the client withdraws \$50 before reaching the 10-lot target, the **entire \$100 bonus is revoked**, and only the remaining equity from real funds is kept.
- Opposite trades across accounts (hedging arbitrage)
- Latency abuse, using expert advisors, or bots
- · High-frequency order placement with no risk, or scalping
- Trading during market manipulation events with the sole intention of exploiting price spikes
